1) Shell script to accept a word and filename as command line argument to search the word in all file

```
#!/bin/bash
echo "Enter filename"
read filename
if [-f $filename]; then
    echo "The file $ filename exists."
    echo "Enter word"
    read word
    grep "$word" "$filename"
else
    echo "The file $filename does not exist"
fi
```

2) Shell script that accepts a file as a command line argument and displays whether it is ordinary file or directory file

```
file=:
#! /bin/sh
file =0
if  test $# -eq 0; then
    echo "Enter file / directory name :\c"
    read file

else
    fle =$1
    fi

if  [-d $file]; then
    echo "$file is a directory"
    ls -d -l $ file
elif [-f $file ]; then
    echo "$ file is the file"
    ls - a -l $file
else
    echo "Invalid path"
fi
```
